

Market Analysis and Lead Generation

Round 3 Results Report

Prepared for Capricorn. 2026-05-27. 25 qualified companies, 5 from each of the top 5 countries.

1. Summary

This round delivers 25 new companies, five from each of your top five countries: Spain, the United Kingdom, Italy, Germany, and Israel. Every company on this list is different from Round 1 and Round 2. None of them are repeats.

The same filter and judgment layer from Round 2 was used. Bad fits are blocked before we ever look at them (agrochemicals, ingredient suppliers, ultra-premium brands, your competitors, animal feed, construction chemistry). The list below is what made it through.

2. Results: 25 qualified companies

United Kingdom (5)

Company	Vertical	Tier	Pts	Key contact	What to sell

A.A. Politiv	Agriculture (films)	T3	77	Guy S., Co-CEO (LinkedIn only)	Anti-hail nets, shade nets, olive harvest nets, drip irrigation tape, layflat hose, grow bags, greenhouse supplies.

3. Contact quality notes

Valid email means the address is confirmed. **Catch-all** means the company domain accepts mail but the exact mailbox is not confirmed (worth testing with a low-stakes first message). **LinkedIn only** means we have the person's name and title but not their email. **No contact found** means Explorium has no person record for that company (search by hand on LinkedIn or use the company contact form).

Of the 25 leads: 11 have a confirmed email, 6 have a catch-all email, 4 are LinkedIn only, and 4 have no contact found (Textil Villa de Pego, Harpo seic, Geomembrane Bresciani, Sadovsky, Deppler and Brauchle).

4. Coverage

By country: Spain 5, United Kingdom 5, Italy 5, Germany 5, Israel 5. By vertical: Agriculture 9, Foodservice Disposables 4, Membranes and Geotextiles 4, Cleaning Supplies 3, Pet Food 3, Wipes 1, Cosmetics 1. By tier: 5 Tier 1, 11 Tier 2, 9 Tier 3.

All 5 Tier 1 leads are in the United Kingdom this round. The UK pool was deepest and best matched the playbook (Bunzl, Green-tech, RAJAPACK are textbook distributor-importers with active procurement). Spain and Israel produced solid Tier 2 leads but no Tier 1. Italy and Germany were thinner, so most leads came in at Tier 2 or 3.

The "what to sell" column is built from your own catalog. Each one is a specific SKU set the judge thinks the company could realistically resell or use, not a generic category.
