

Market Analysis and Lead Generation

Round 4 Results Report (Test Run of the New System)

Prepared for Capricorn. 2026-06-11. 9 qualified companies from the United Kingdom and Spain.

1. Summary

This is a test round. It is the first run of the new system we built from your Round 3 feedback. You told us two things matter most: the company should import goods in volume, and it should sell its own brands. The system now looks for written proof of both before it calls anything Tier 1.

We ran the United Kingdom and Spain. We checked 41 new companies and kept 9. The other 32 were filtered out. Most of them were factories that show no sign of importing, companies that only sell other people's brands, or companies in the wrong product category. None of the 9 is a repeat from earlier rounds.

New in this round: every Tier 1 company comes with proof you can check yourself. For the UK we use the official customs importer register (a free government list of companies that really imported goods, with the product codes they imported under). For all companies we also quote their own website. The proof is written next to each Tier 1 below.

2. The three Tier 1 companies, with proof

Westpak Group Ltd (United Kingdom, foodservice packaging), 97 points

A UK distributor of food and foodservice packaging, headquartered in Orpington (Greater London), with three regional distribution centres.

Import proof: the UK customs register (March 2026) lists Westpak Group Limited, Orpington, as an importer under product codes 3923 and 3924 (plastic packaging and plastic tableware) and 4804/4819/4823 (paper packaging). **Own brand proof:** their site sells their own ranges, StikLok (tamper-evident delivery bags) and HeatWave (insulating pizza box liners, winner of two 2024 innovation awards).

What to sell: bagasse bowls and plates, kraft takeaway boxes, PLA and kraft hot and cold cups, paper soup cups, kraft salad packs. **Contacts:** Seth Hicks, Managing Director <seth@westpakuk.com> and Nancy Kainth, Senior Sourcing Manager <nancy.kainth@westpakuk.com>. Both emails check out against their mail server.

How to open: lead with new product development. They won two innovation awards in 2024 for their own ranges, so offer to be their scout in Asia for the next winner, with reliable supply on the lines they already import.

Geosynthetics Limited (United Kingdom, geotextiles and membranes), 100 points

A UK distributor in Hinckley, Leicestershire, focused fully on geotextiles, geomembranes and ground engineering fabrics. This is the strongest profile match of the round.

Import proof: the UK customs register lists Geosynthetics Limited, Hinckley, as an importer, including code 5603 (nonwoven fabrics, the base material of geotextiles). We matched the register address to their website. **Own brand proof:** Cellweb and Bentotex are their own UK registered trademarks. They also distribute a few third party lines, but their own brands lead their catalog.

What to sell: woven and nonwoven geotextiles in PP and PET, breathable membranes, synthetic roofing underlay, rock wool and glass wool. **Contacts:** Chris Foxton, Owner <chris@geosyn.co.uk> and Zoe Brookes, Purchase and Procurement Coordinator <zoe.brookes@geosyn.co.uk>. Both emails check out against their mail server.

How to open: lead with price and reliable supply. They already import the same fabrics and sell them under their own trademarks, so better container pricing on PP and PET geotextiles goes straight to their margin.

KOOAL Servicios Alimentacion SL (Spain, foodservice disposables), 97 points

A Spanish maker and importer of single-use foodservice products. Office in Pinto (Madrid), factory and warehouse in Borox (Toledo), selling across Spain and Portugal.

Import proof: their website's distribution section says they work with suppliers on five continents ("Contamos con los mejores proveedores en los 5 continentes"). This is a written sourcing claim from their own site; worth confirming volumes on the first call. **Own brand proof:** 1solouso is their registered brand with its own webshop (www.1solouso.com), one of five brands they own (with KOOALUX, BAGGY, CEAL and BIOENVASE).

What to sell: bagasse bowls and plates, kraft trays, PLA-lined paper cups with lids, paper straws, napkins, foil containers. **Contact:** Luis Antonio Bernardos Armenta, Owner. Our lead database had no person for this company, so we found the owner in the Spanish business registry. No email yet.

How to open: lead with range growth. They own five brands and a webshop, so offer new bagasse and PLA lines they can add under 1solouso without building factory capacity for them.

3. All 9 qualified companies

United Kingdom (4)

Company	Vertical	Tier	Pts	Key contact	What to sell
Westpak Group Ltd	Foodservice Packaging	T1	97	Seth Hicks, Managing Director <seth@westpakuk.com>; Nancy Kainth, Senior Sourcing Manager <nancy.kainth@westpakuk.com>	Bagasse bowls and plates, kraft takeaway boxes, PLA and kraft cups, paper soup cups, kraft salad packs.
Geosynthetics Limited	Membranes and Geotextiles	T1	100	Chris Foxton, Owner <chris@geosyn.co.uk>; Zoe Brookes, Purchase and Procurement Coordinator <zoe.brookes@geosyn.co.uk>	Woven and nonwoven geotextiles in PP and PET, breathable membranes, synthetic roofing underlay, rock wool and glass wool.
Tri-Star Packaging	Foodservice Disposables	T3	55	Chloe Lace Adams, Purchasing Assistant <chloe.adams@tri-star.co.uk>; Jeyda Guzeltas, Junior Buyer <jeyda.guzeltas@tri-star.co.uk>	Bagasse bowls and plates, kraft and PLA containers, cups, napkins, wooden cutlery, cling film. Note: they sell other companies' brands, so they are low priority under your own-brand rule.
LBS Horticulture	Agriculture	T3	37	Richard Barker, Commercial Director (LinkedIn only); Olivia Monaghan, Account Manager <olivia.monaghan@lbs-global.com>	Drip irrigation tape, layflat hose, anti-hail nets, shade nets, grow bags, mulch film. Their site blocked our automatic check, so import status is unconfirmed.

Spain (5)

Company	Vertical	Tier	Pts	Key contact	What to sell
KOOAL Servicios Alimentacion SL	Foodservice Disposables	T1	97	Luis Antonio Bernardos Armenta, Owner (from the business registry, no email yet)	Bagasse bowls and plates, kraft trays, PLA cups with lids, paper straws, napkins, foil containers.
ILSER GRUP	Cleaning Supplies	T2	77	Marc Ceron Castello, Consejero Delegado <marc@ilser.net>	Cleaning cloths, mop heads, paper hand towels, garbage bags, gloves. Own brand confirmed on their site; import status not yet proven.
Food Pac Service	Foodservice Packaging	T2	52	Francois Beyler, Managing Director <fb@foodpacservic.com>; Marc Beyler Ros, Commercial and Operations Director <comad@foodpacservic.com> (catch-all)	Bagasse bowls, kraft boxes, PLA cups, paper straws, cling film, foil containers. Their site blocked our automatic check; worth a manual look.

Company	Vertical	Tier	Pts	Key contact	What to sell
Plasticosur S.A.	General Wholesale (disposables and cleaning)	T3	40	Antonio Colsa, Director General (LinkedIn); company inbox atencioncliente@plasticosur.com	Disposable tableware, napkins, cleaning cloths, mop heads, gloves, garbage bags. Note: disposables are a smaller part of a broad wholesale catalog, so low priority.
DISPAN	Foodservice and Bakery Supplies	T3	52	Fran R., Director Comercial <fran@dispan.es> (catch-all)	Takeaway trays, paper and PLA cups, pizza and sandwich boxes, deli containers. Their core is bakery tools and machines.

4. What we filtered out (32 companies)

The new rules removed 32 of the 41 companies we checked. The main reasons, with examples:

Factories with no sign of importing finished goods: SOTRAFA, AZUD, Caudal, Geopannel, and Goma-Camps (a tissue maker). Two factories, Polythene UK and Roberts Mart, do appear in the customs register, but their imports are raw film and resin for their own production, not goods for resale. Companies that mainly sell other people's brands: Tudor Environmental, Eurodel, and Regaber (exclusive distributor of global irrigation brands). Wrong product category: pool supplies (Baeza), plastic pipes (Frans Bonhomme, Plastic Pipe Shop), builders merchants (Civils and Lintels, Macnaughton Blair), irrigation machines (Novagric). One company (Gestiriego) was removed because its website shows an error to every visitor.

5. Contact quality notes

Valid email means we checked it against the company's own mail server and it accepts that exact mailbox. **Catch-all** means the domain accepts any address, so the exact mailbox cannot be confirmed (worth testing with a low-stakes first message). **LinkedIn only** means we have the person's name and title but no email yet.

We added an email-finding step this round. We now have 15 named contacts across the 9 companies: 5 with a checked, valid email (Westpak's two, Geosynthetics' two, and ILSER), 4 more with a valid or catch-all email, and the rest on LinkedIn. Eight of the 9 companies have at least one working email; only KOOAL has none in our sources, so use the owner's name on LinkedIn or the website form. One email our data source returned belonged to a person's previous employer, so we removed it rather than send you a bad address.

6. Coverage

By country: United Kingdom 4, Spain 5. By tier: 3 Tier 1, 2 Tier 2, 4 Tier 3. By vertical: foodservice disposables and packaging 6 (counting Plasticosur, which spans foodservice and cleaning), cleaning supplies 1, agriculture 1, membranes and geotextiles 1.

A note on the smaller batch: this round checked two countries on purpose, as a test of the new rules. The bar for Tier 1 is now much higher than in Round 3. A company only gets there with written proof that it imports and sells its own brands. Tier 2 means real product fit where one of those two proofs is still missing. Tier 3 means worth knowing about, but low priority, and the reason is written on each row.
